Course Descriptions

This course introduces the key theories, approaches, and ideas in the field of sociology of education. We will explore influential studies in sociology of education, and link them to educational challenges and problems in the real world. Education-related topics covered in this course will include stratification and inequality, school, family, peers, community, rural-urban divide, migration, gender, mass education, mental health, and elite formation, among others. Readings will not be region-specific but topic-based, representing the typical research questions on a particular topic. By reading and discussing empirical studies throughout the course, students will learn how to discover and analyze the key sociological and practical issues of education.

Objectives

Major Objectives

Familiar with the most fundamental theories and concepts in sociology of education.
Know how to analyze educational issues from a sociological instead of personal perspective.
Understand the structural factors shaping and being shaped by educational outcomes.
Aware of the role of education (alleviating or exacerbating) in the worldwide social inequality.

Minor Objectives

Learn to read and evaluate empirical studies and think critically.

Develop an interest in education (either research or practice).

Textbook and Readings

All required readings of the course will be posted on Blackboard. No textbook is required, but the following book is recommended for reference.

Arum, Richard, Irene R. Beattie, and Karly Ford, eds. 2014. *The Structure of Schooling: Readings in the Sociology of Education*. 3rd ed. Los Angeles: SAGE Publications.

Academic Integrity

Normal standards of academic integrity apply. The university adopts a “zero tolerance” policy on academic dishonesty. Please refer to the university’s policy and regulations at <https://www.cuhk.edu.hk/policy/academichonesty/>.

Grading and Evaluation

Students are expected to attend all lectures and participate in the discussions in class. Also, students should attend tutorial sessions and do presentations. Details of tutorial sessions are listed in a separate file. There will be a closed-book mid-term and final exam. The dates of exams will be announced at least one week ahead and each exam counts the same toward the final grade.

Final grades will be calculated as follows:

Participation in Class	10%
Participation in Tutorials	5%
Presentation in Tutorials	10%
Exams	20%*2=40%
Final Paper	35%

Grade Descriptors

- A Outstanding performance on all learning outcomes.
- A- Generally outstanding performance on all (or almost all) learning outcomes.
- B Substantial performance on all learning outcomes, OR high performance on some learning outcomes which compensates for less satisfactory performance on others, resulting in overall substantial performance.
- C Satisfactory performance on the majority of learning outcomes, possibly with a few weaknesses.
- D Barely satisfactory performance on a number of learning outcomes.
- F Unsatisfactory performance on a number of learning outcomes.

Research Topics for Group Projects

1. Taking Hong Kong or any other country/region as a case study, which of the functional and conflict theories could better explain the increased requirement of schooling for employment?
2. How do different forms of capital (social, cultural, or economic capital) affect educational outcomes? You can choose one form or different forms of capital.
3. How do family backgrounds affect educational outcomes? Family backgrounds are broadly defined, which could include parental education, family income, parents' occupations, family environments, among others. You can choose a particular aspect or a combination of different aspects of family backgrounds.
4. How does education affect income?
5. How does education affect employment?
6. From the perspective of education, explain the transmission of inequality across generations.
7. Could education promote social mobility?
8. Do schools maintain or reduce the inequality between rich and poor students?
9. Does school type (public or private, elite or non-elite) matter for educational outcomes?
10. Does school type (elite or non-elite) matter for employment (or income)?
11. Do girls have advantages in educational outcomes? Why?
12. Do left-behind children in rural areas be disadvantaged in educational outcomes, compared with non-left-behind rural children?

13. Do migrant children from rural areas to urban areas disadvantaged in educational outcomes, compared with urban children?

14. How do peers affect educational outcomes?

15. How do communities or neighborhood affect educational outcomes?

16. Will new technologies increase or reduce educational inequality?

17. Will online education increase or decrease students' academic performance, compared with traditional face-to-face instruction?

18. Does online education weakens or even will replace the role of school?

19. How does education expansion relate to functional and conflict theories?

20. Does education expansion increase or decrease social inequality (e.g., educational inequality, income inequality)?

21. What is the relationship between education and mental health? What is the implication of this relationship for education in practice? (You might focus on a particular mental health problem.)
